

**Minutes of Capital Review Committee Meeting  
Tuesday, February 27, 2007  
123 Jesse Hall**

**Attending:** Jim Coleman, David Housh, Jackie Jones, Alan Marshall, Michael Nolan, Joey Riley, Cathy Scroggs, Scott Shader, Gary Smith, Ruth Brent Tofle, Bruce Walker, Gary Ward and Andrew Cafourek

**Absent:** Brian Foster, Ken Dean and Mike Middleton

**Guests:** Peter Ashbrook, Ted Curtis, Kevin Meinheart, Chad Pfister and Marsha Smith

A Capital Review Committee meeting was held on Tuesday, February 27, 2007, at 1:30 p.m. in 123 Jesse Hall and the following was discussed.

**1. Pipeline Research Building Addition – Gary Ward**

Gary Ward stated that the project consists of an addition to the Pipeline Research Building to house research that has been relocated from Lafferre Hall during the renovation scheduled for the near future. A 6,000 square foot pre-engineered building will be constructed adjacent to the existing Pipeline Research Building. The College of Engineering is funding this project.

**Recommendation:** CRC approved the request to construct an addition to the Pipeline Research Building but would like the building designated as being a temporary structure.

**2. Marx Building – Brain Imaging Center – Gary Ward**

The Brain Imaging Center (BIC) is a 1,850 square foot addition to the east end of the Marx Building. This addition will be funded by the College of Arts and Science and will house a Magnetic Resonance Imaging (MRI) machine that will be the core of the facility. The handout stated that upon completion of this project, the Psychological Science Department and the Art Department will share portions of the existing building while the addition will be managed completely by Psychological Science. In addition to the new BIC, a 1,000 square feet of space will be renovated on the first and second floors of the Marx Building. This space will include a reception area, waiting room, subject interview room, data-analysis space, offices, restroom and equipment room. The existing exterior is to remain intact but will be complimented by the exterior of the addition which will be a combination of brick, translucent panels and fiber resin panels with an appearance similar to stone. Changes to the main entrance and some of the parking area will be made to meet current ADAAG and IBC accessibility requirements. Total cost of the project is \$1,756,000.

**Recommendation:** CRC voted to approve this project as submitted.

**3. Signage for Hitt Street and Virginia Avenue Garages – Cathy Scroggs**

Cathy requested that level indicators be posted in Hitt Street and Virginia Avenue Garage. Cathy stated that when visitors park in the garages they can not tell which level they are on.

**Recommendation:** Gary Ward stated that he would investigate this request and contact Cathy Scroggs with his findings.

**4. MU Bike Plan (Information Only) – Peter Ashbrook, Chad Pfister**

In 2006, the City of Columbia was selected to participate in the Non-motored Transportation Pilot Program. Columbia is receiving \$22 million over the next four years to develop a network of non-motored transportation facilities that include sidewalks, bicycle lanes and trails that connect directly with schools, residences, businesses, recreation areas and other community centers. The plan is to have over 100 miles of new bikeways and sidewalks.

The meeting adjourned at 2:30 p.m.
