Space Planning Advisory Committee Meeting
March 14, 2000

Recreational Services Space Request for Total Assignment of Rothwell Gymnasium

A. Current Occupants of Rothwell Gymnasium

Vice Chancellor for Student Services
1. Recreational Services

College of Education
2. Dean of Education – Swing Space for Townsend Hall Renovation
3. Information Sciences and Learning Technologies
4. Curriculum and Instruction

Note: The Dean of Education and the Information Sciences and Learning Technology will be returning to Townsend Hall. Curriculum and Instruction was in this building prior to the Townsend Hall renovation and presumably will remain.

College of Human Environmental Sciences
5. Exercise Physiology Labs

Note: HES is today submitting a space request for additional space in Rothwell Gymnasium for the new Exercise Physiology mission enhancement faculty space to relocate Dietetics from Clark Hall. HES is requesting all of the space temporarily occupied by Information Sciences and Learning Technologies in the basement of Rothwell Gym, Room 42 a general pooled classroom and all of the curriculum and instruction space on the first floor.

Centrally Scheduled Space
6. Centrally Scheduled Classrooms

Note: This pending space assignment would require that classrooms 42, 44 and 202 no longer be used as centrally scheduled classrooms.

B. Color-Coded set of floor plans indicating current assignment of space in Rothwell Gym
March 24, 2000

To: Space Planning Advisory Sub-Committee Members

From: Scott Shader
Manager

Subject: Meeting Minutes from March 14, 2000

Attendees: Ken Dean, Glenda Moum, Scott Shader, Don Sievert, Bea Smith, and Gary Smith

A Space Planning Advisory Sub-Committee meeting was held on March 14, 2000 at 10:00 a.m. in room 231 Hulston Hall and the following was discussed:

- Gary Smith began the meeting by stating that his main goal for the committee was to obtain their recommendation of the Recreational Services space request for the total assignment of Rothwell Gym.

- Scott Shader handed out a summary of occupants of Rothwell Gym along with a set of color-coded drawings indicating Recreational Services proposed use of Rothwell Gym. Bea Smith distributed a space request form on behalf of the College of Human Environmental Sciences. Bea Smith's request is for additional space in Rothwell Gym for new Exercise Physiology faculty members via mission enhancement, and a proposed move of the Dietetics department from Clark Hall to Rothwell Gym.

- The committee recognized that there are other tenants besides Exercise Physiology and Recreational Services in Rothwell Gym such as Curriculum and Instruction and Information Sciences and Learning Technologies (SISLT) from the College of Education, and several centrally scheduled classrooms. The committee agreed that if Recreational Services space request is approved, the campus should provide the necessary relocation space and pay for the costs associated with the move of those non-Recreational Services Departments such as Curriculum and Instruction. These departments were in Rothwell Gym prior to the Townsend Hall renovation and are not planning to move out of Rothwell Gym at this time. The committee also asked if all of the space that Education temporarily occupies in Rothwell Gym, (SISLT) would be retained by the College of Education or returned back to the campus for reassignment. The committee recommended that if the (SISLT) space will be returned back to the campus for re-assignment, then CRC should hold on making any new assignments of this space, except for the additional space needs for Exercise Physiology, until the funding issue is resolved for the Recreational Services space request.
In response to Bea Smith’s space request, the committee recommends that the Recreational Service’s renovation and expansion project provide the necessary space for the Exercise Physiology program since the Exercise Physiology Labs were located in Rothwell Gym prior to Recreational Services space request. In addition, Recreational Services should pay for the renovation and new space that would be needed for the Exercise Physiology program, in order for this unit to vacate its current location in Rothwell Gym.

The Committee also agreed to recommend that the proposed move of Dietetics to Rothwell Gym be postponed until funding is approved or disapproved for this project. If the funding is approved, then Bea Smith’s request for the Dietetics Department space in Rothwell would have to be approved by CRC and incorporated into the Recreational Services Renovation Plans, along with the identification of additional funds to pay for the move. Lastly, if this project does not receive funding, Bea Smith’s space request to move the Dietetics Department to Rothwell Gym will be reviewed on a stand-alone basis at such time.

Gary Smith concluded the meeting by stating that he will take the committee’s recommendations to CRC.

The meeting ended at 11:30 a.m.
