Performing Arts Center to anchor proposed fine-arts complex

Campus planners are proposing a performing arts center as the lead project for what will eventually be an arts village on a 28.4-acre parcel of land south of Hospital Drive.

Anchored by the center, the complex will include facilities for the university’s school of music and fine arts departments, an art museum, hotel-conference center and a 2,000-space parking garage.

The performing arts center will convey a striking gateway image to the campus at the intersection of Stadium Boulevard and College Avenue. With the mission statement and conducted a space needs analysis campus art, the Museum of Art History and Archaeology, and central campus locations for such a center were gateway image to the campus at the intersection of Drive, connects with the Health Sciences complex.

remaining major developments contiguous to the University Concert Series.

The proposed reconfiguration of Hospital Drive will form new development sites for clinical and research facilities north of the drive adjacent to the existing hospital and medical school campuses. The proposal for a health science research and teaching center will augment the need for additional structure parking to serve potential growth in the southeast gateway area. A hotel and conference center both complementing and serving the arts complex, medical and clinical facilities, and other campus functions, is illustrated on the map of the Campus Master Plan.

The University of Missouri – Columbia's Campus Master Plan is an ongoing, interactive planning process begun in 1980 to ensure an open, dynamic and functional building and campus development. The goal of the Master Plan is the creation of a highly functional, efficient environment that is both inviting to students and enhances MU’s reputation of teaching, research and public service.

The process continues to build on planning concepts for the integration of architecture and landscape that were developed in the 1980s to accommodate the academic development of Mizzou’s public institutions and, later, before the inauguration of Academic Hall by 1984, creation of new academic buildings housing the “Building Campus” on the Francis Quadrangle. In the early 1990s, the philosophy of improving and beautifying university grounds was extended with the development of the “White Campus.” The 1990s, and 2000s saw a time of great geographic expansion, to serve explosive enrollment growth. After securing in 1991 the services of a nationally recognized master campus planning consultant, today’s planning concepts – to which campus designers adhere scrupulously – remain that of an unified, open space system that provides a strong framework for the planning of campus building, smaller and smaller, linear, open corridors, interior spaces, adjacent spaces and campus-edge open space

A proposed 2,200-seat performing arts center will create a striking gateway to the campus at the southeastern corner of Stadium Boulevard and College Avenue. Fifty plans for new development sites for clinical and research facilities north of the drive adjacent to the existing hospital and medical school campuses.

A hotel and conference center both complementing and serving the arts complex, medical and clinical facilities, and other campus functions, is illustrated on the map of the Campus Master Plan.

CAMPUS PLANNING COMMITTEE

The Campus Planning Committee advises the vice chancellor for Administrative Services on space needs of the campus. MizzouLetter 2003-2004 are:

Chair Ralph Taylor, professor and chair of environmental design

Faculty

William Henderson, professor of philosophy

Rebecca Genauer, educational services librarian

Leticia Lunden, associate professor, art

Randy Miles, associate professor of art and atmospheric sciences

Staff

Ken Brooks, director of MU Research and Commercialization

Stan Price, director of the MU Research and Commercialization

Merry Walker, director of administrative services – Engineering

EX-OFFICIO

Edwards, interim assistant vice chancellor – Facilities

Larry Bluhm, interim director of Design, Planning and Construction

Jim Brown, director of Parking and Transportation

Chris Korns, assistant to the chancellor for University Affairs

Amir Mirza, administrative assistant to the chancellor

Marilyn Bresnahan, buildings and public service

Joey Riley, assistant director of Parking and Transportation

Chris Korns, assistant to the chancellor for University Affairs

Arthur Merick, MU Radiation Protective

Frankie Minor, director of Residential Life

The Morrison, planning assistant

Omar Onay, professor emeritus

Robert S. Simmons, archivist, University System

Sarah Sally Rhee, director of Disability Services

CAPITAL REVIEW COMMITTEE

The Capital Review Committee is charged with providing advice to the provost and vice chancellor for facilities management services, as appropriate, on campus land use regarding the use of existing space, maintenance and repair of existing space, priorities for innovation of existing space, and priorities for adding new space. Members are:

Chair Brenda Johnson, provost

Members

James Colman, vice president for research

Larry Edwards, interim assistant vice chancellor – Facilities

David Hare, director of the University's facilities

Jaeck Jones, vice chancellor for Administrative Services

Chris Korns, assistant to the chancellor for University Affairs

Alan Marshall, University Affairs

Michael Medlock, University Affairs

Michael Nolan, director of research

Joyce Matthews, director of Space Planning and Management

Benny Schwartz, professor of environmental design

Cathy Sweeney, vice chancellor for Student Affairs

Scott Skous, director of Space Planning and Management

Gay Sprague, director of Space Planning and Management

Ralph Taylor, professor and chair of environmental design

Bruce Walker, dean of the College of Business

PLANNING PRINCIPLES

RESPOND TO CLIMATE AND ENVIRONMENT: Design buildings and landscapes to be compatible with the regional environment and to conserve natural resources.

UNIFIED TOWARD THE UNIVERSE: Unify the campus while clustering and grouping buildings as components.

DIVERSITY WITHIN THE UNITY: Create and maintain campus settings that bring together the diversity of people, environments, and culture.

STRONG SENSE OF PLACE: Make the campus a distinctive and memorable place for all members of the University community and for campus visitors.

ARCHITECTURAL INTEGRITY: Design buildings to reflect the unity, maturity, and sensibility aestheticians in the historic architecture of the campus.

PRIDE OF THE STATE: Express state proudly the functional importance of the campus to the state, nation and world.

UNIFIED TOWARD THE UNIVERSE: Unify the campus while clustering and grouping buildings as components.

DIVERSITY WITHIN THE UNITY: Create and maintain campus settings that bring together the diversity of people, environments, and culture.

STRONG SENSE OF PLACE: Make the campus a distinctive and memorable place for all members of the University community and for campus visitors.

ARCHITECTURAL INTEGRITY: Design buildings to reflect the unity, maturity, and sensibility aestheticians in the historic architecture of the campus.

PRIDE OF THE STATE: Express state proudly the functional importance of the campus to the state, nation and world.

UNIFIED TOWARD THE UNIVERSE: Unify the campus while clustering and grouping buildings as components.
